The basis of the party will be to secure persons independent in politics who are willing to fight every saloon man that may be nominated on any ticket of the regular parties. That the party will overwhelm and absorb the Prolibition party, is not doubted. It is also believed that the Catholic shurch, with all its societies will be brought in unison with the Protestants on this question, as it is in direct accord with the proclamation of Bishop Waterson against Catholics in the saloon traffic

the Income Tax

N.w York, Aug 22 A Washington special to the Sun says In addition to the long list of errors found in the Gorman tariff bill, the surprising discovery has been made by the treasury department officials that no appropriation has been made for putting into effect the in come tax provisions. The collectors of internal revenue can do nothing under these circumstances in the direction of preparing to collect the tax. The treasury officials seem to be blampless, for they forwarded to the appropriation of \$500,000, to be used during the current itscal year in carrying out the income tax provisions of the tariff bill, if it should become a law.

In Scerciary of the Treastry through the Commissioner of Internal Reviewe estimated that the appointment of 250 diputy collectors and eighteen or twenty additional cierks in the Washington office would be necessary to begin the preliminary work Whether by accident or design, height the House nor the Senste appropriations committee paid any attention to Secretary Carlisles actimate, and the internal revenue bureau is, therefore, helpless and must deter all airangements until Congress provides.

s bound to suffer severely from the effects of this Democratic tariff. Lumber, dressed and undressed, goes upon the free list The term dressed lumber may be stretched to almost any extent thus leaving the Maine lumbermen exposed to unlimited Canadian competition. When it comes to agricultural products there has been a general slashing of prices al along the line, depriving the farmers of all protection because the low rate of ad valorem duties will not keep out Canadian products. Wool is placed on the free list, the effect of which will be to

destroy the sheep raising industry in this The voters of this State should out the list out and study it with care between now and the day of election. The Sugar Trust and the Whiskey Trust have been amply protected in the mongrel tariff bill, but the interests of the people of Maine are to be sacrificed by this Demoeratic Congress. In September the voters will have an opportunity to let

We are told that President! Cleveland the been resting quitely at Gray Gables while meditating over the tariff situation When a man has to take distasteful pedicine it will not grow any more palatable by delaying the dose. It is true that the President has cause for meditation in gennection with the summary manner in which he has been desposed from his former position of Supreme pleta or, but the dish of crow is ever resent and should be bolted or rejected While the President is meditaing the several trusts in whose interest the tariff was framed are making vast sime of money at government expense

FOUL ASSASSINATION

Chipple Creek, Col., Aug. 22. F. B., Work, president of the Ben Hur Mining Company, was shot through both arms last night near Victoria. J. M. Rossberry, sepretary of the same company, was shot by a gang of six men, who fired at them with Winchester riles. #### WASHINGTON NEWS.

Correcting the Tariff Bungle.
Washington, Ang. 22. Senators Aldrich and Quay were at work this morning endeavoring to smooth the way for the passage of the House bill through the Senate that corrects the errors made in the tariff bill relative to the rebate on alcohol used in the arts and sciences, such action owing to the absence of a quorom to be had by unanimous consent. It is understood that if the bill does puss the Senate it will go back to the House in a very different shape from that in which it left it...

The sugar men, it is said, will amend it by tacking on to it as a rider, the Methilley bounty for the crop of 1894, and it is not improbable that other amendments looking to the protection of some industries that suffered by reason of the tariff bill will be made to the bill. The intention is to give the House the alignmative of agreeing to these amendments of permitting the error regarding alcohol to go uncorrected. Correcting the Tariff Bungle.
